

## MagStar Hydraulic Magnet Generator

This generator system is powerful, innovative, safe and maintenance-free. These generators are highly durable, electronically controlled brush-less synchronous generators. They are maintenance-free, highly reliable and designed for continuous operation. The low-noise housing of the generator is splash-proof according to IP54 specifications and provides highly effective ventilation.

- Waterproof and maintenance-free IP54 system
- Wide generator speed range
- Load limit control
- Torque control
- Enhanced drive protection in the event of under-speed
- Magnet power is fully adjustable
- Integrated isolation monitoring
