SHEARFORCE RAIL CUTTING SHEARS

Add the power of ShearForce rail cutting shears to your equipment fleet.

From initial purchase to maintenance and repairs, ShearForce shears offer the best return on your equipment investment. ShearForce rail cutting shears are designed to quickly and precisely cut high tensile strength rails. With unequalled power and speed, the RC35 rail cutter shear allows you to efficiently break North American flat bottom type rails of all sizes.

**SAVE MONEY WITHOUT
SACRIFICING POWER AND
DURABILITY.**

- Enclosed hydraulic cylinder
- Heavy-duty main pin and bearing
- Upper and lower jaws built with the strongest Hardox® steel for resistance to the toughest material and environment.
- Easily interchangeable cutting blades, bolts, and shims
- Heavy-duty rotation engines with planetary reduction gears for 360° of rotation.
